### JL Industries Introduces a Revolutionary New Curb-mounted Safety Post for Roof Hatches

**Bloomington MN – September 30, 2008**

JL Industries, provider of roof hatches and smoke vents, is introducing a new safety post with a curb-mount design that is easily installed and stows inside the existing roof hatch curb.

After the user opens the roof hatch, the 6 lb LP-6 safety post is raised with one hand and locked into an upright position. The user can then climb from the ladder to the rooftop, using the post for a hand-hold. The post can be easily retracted and the roof hatch closed for safety, while the user is on the roof.

The patent-pending LP-6 is designed for 36" or greater roof hatches and is constructed of heavy-duty, safety yellow painted steel.

Contact JL Industries at 800-554-6077 or visit [www.jlindustries.com](http://www.jlindustries.com) for more information.
